

About

Software Developer with 2.5+ years of experience designing and developing scalable web applications using React.js, Node.js, Express, and MongoDB. Skilled in writing clean, efficient, and maintainable code. Proven ability to troubleshoot, optimize performance, and collaborate across teams to refine design and architecture on the cloud. Awarded for high-quality delivery. Seeking a role to contribute to innovative products while continuously learning new technologies.

Professional Experience

Jr. Software Engineer

Hemas Enterprises Private Limited | Apr 2023 - Present

- Developed, tested, and deployed multiple SaaS products using the MERN stack.
- Wrote clean, reusable, and optimized code, improving page load time by 30% and API performance by 20%.
- Collaborated with product managers, UI/UX designers, and developers to refine product features and architecture.
- Implemented real-time features using WebSocket for chat, notifications, and progress tracking.
- Debugged, maintained, and continuously improved existing applications to ensure reliability and scalability.
- Practiced Agile methodology for sprint planning and progress tracking.

Products & Projects

Lurn

AI-powered tutor platform delivering

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, OpenRouter

- Built an AI tutoring platform with React, Node.js, Express, MongoDB, and OpenRouter LLM for personalized learning.
- Designed RESTful APIs for onboarding, progress tracking, and AI-driven lesson delivery with secure, scalable performance.
- Integrated LLM workflows using backend proxying, caching, and error handling for real-time, context-aware tutoring.
- Streamlined data modeling and state management with MongoDB/Mongoose and React hooks to enhance persistence and UX.

GoalSync

Team goal alignment & Performance tracker

Tech Stack: Next.js, Redux, Node.js, MongoDB, Material UI

- Built OKR (Objectives & Key Results) tracking dashboard for team performance visibility.
- Developed notification system for Objective & Key result creation, goal updates, comments, and status changes.
- Managed global state with Redux, secured routes with JWT, and built a responsive UI with Material UI.

Trove

A comprehensive knowledge management and collaboration platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Zustand, Tailwind CSS, Websockets

- Implemented real-time chat and WebRTC-based audio/video calling, enabling peer-to-peer team discussions.
- Used WebSocket for instant messaging, typing indicators, and live presence tracking.
- Designed a scalable backend with Node.js, Express, and MongoDB and Applied Zustand for clean state management and Tailwind CSS for modern, responsive UI.

Technical Skills

Front-end Technologies

JavaScript HTML CSS React.js
Next.js TailwindCss Redux

Back-end Technologies

Node js Express.js MongoDB

Libraries & Utilities

Github WebSocket JWT Axios
